

ABSTRACT

N-[N-(3,3-dimethylbutyl)-L- α -aspartyl]-L-phenylalanine
1-methyl ester is converted from a light powder to
5 relatively dustless, free-flowing granules using
compaction, preferably roller compaction, and size
reduction processes. These granules are suitable for
use in a variety of applications. Food products
sweetened with granulated N-[N-(3,3-dimethylbutyl)-L- α -
10 aspartyl]-L-phenylalanine 1-methyl ester and methods of
sweetening food products with such N-[N-(3,3-
dimethylbutyl)-L- α -aspartyl]-L-phenylalanine 1-methyl
ester are also disclosed.
